

Bulk RNA-seq

Definition

Gene expression in tissues
& cell populations

Cost

Low

Data Complexity

Simple

Best For

Overall gene expression
& gene function

What genes are expressed

scRNA-seq

Definition

Transcriptome of individual
single cells

Cost

Higher

Data Complexity

Complex

Best For

Cell phenotypes &
developmental trajectories

Which cell types express them

Spatial Transcriptomics

Definition

Gene expression + spatial
location of cells

Cost

Higher

Data Complexity

Multi-field

Best For

Spatial structure & cellular
interactions in tissue

Where in the tissue they're expressed
